COMMIT USA

WHY COMMIT AI?

aws PARTNER Premier Tier Services

aws PARTNER Generative AI Services Competency

30+
Dedicated AI Architects, & DevOps

100+
Gen AI Projects Delivered

AWS GenAI Experience
Bedrock, Rekognition, Textract, Sagemaker, AmazonQ

Commit AI has been a trusted partner on dozens of MLOps, AI Solutions, and GenAI projects. We cater to startups, enterprises, and governmental institutions across a wide spectrum of sectors, including Finance, Insurance, Medical, Martech, AdTech, Defense, AgroTech, Manufacturing, EdTech, Automotive, and Retail. We offer services such as SA On-Demand, Gen AI Workshops, POCs, and Implementation.

AI Solutions
- High-Performance Computing
- Automation and Chatbots
- Predictive Analytics
- Custom AI Development
- Rapid Software Development
- Video & Voice Analytics

MLOps Services
- Streamlined Machine Learning Operations
- Automated DevOps Integration
- Model Monitoring and Optimization

GenAI
- Creative Content Generation
- Data Augmentation
- Innovative Prototyping

Data for AI
- Data Platforms for AI
- Data Science

Customer Use Cases

Streamlined manufacturing safety analysis with **Claude v3 Vision on Bedrock**, predicting and monitoring unnoticeable safety hazards. Business Impact:
Reduced workplace accidents and decreased safety inspection time.

Identified telecom network quality impairments using **RDS's efficient SQL queries alongside Claude v3 on Bedrock**, addressing issues like signal degradation and latency. Business impact:
Decreased network downtime.

Enhanced coding processes with **SageMaker and Bedrock's** Large Language Models (GenAI), enabling tasks such as unit tests, code visualization, and chatbot integration. Business impact:
Accelerated time-to-market for software releases and Improved developer productivity.

Enabled smart surveillance with **SageMaker's semantic video** interpretation and user-based queries, including violation identification. Business impact:
Increased security incident response time.

Implemented face recognition for security using **Rekognition**, executing sophisticated queries to retrieve images for press committee PR. Business impact:
Improved public relations efficiency and expedited image retrieval process.
